AFNS 2025 TEST EXPERIENCE

AFNS EXPERIENCE NO 16

AFNS 2025

Name: XYZ
Centre: ASRC Multan
Test Date: 9th September 2025
Result Status: ☒ Passed Alhamdulillah

Intelligence Portion:

The intelligence part was moderate. Verbal and non-verbal questions were mostly repeated from Sir's practice materia

Academic Portion:

The academic section was tricky and time-consuming, especially Biology and Chemistry, as the MCQs were mostly indirect and conceptual. Physics included some tough numericals, and English focused heavily on grammar.

Questions I remember:

Biology:

In DNA replication, which enzyme unzips the double helix? → Helicase

Which organelle is called the powerhouse of the cell? → Mitochondria

Which phylum of Kingdom Animalia has a water vascular system? → Echinodermata

Which plant hormone promotes cell elongation? → Auxin

Chemistry:

Aldol condensation occurs between? → Aldehydes/ketones with α -hydrogen

Which alcohol reacts with Lucas reagent immediately? → Tertiary alcohol

The hydrate is maximum for? → Formaldehyde

Which reagent converts primary alcohol to aldehyde? → PCC (Pyridinium chlorochromate)

Hybridization of central carbon in ethene (C_2H_4)? → sp^2

Physics:

A body of mass 10 kg moving at 5 m/s has kinetic energy? → 125 J

A coil of 500 turns carries 2 A current; magnetic moment? → 1000 Am²

If the frequency of light doubles, what happens to the energy of a photon? → It doubles

Time period of a simple pendulum of length 1 m? → 2 seconds

In Young's double-slit experiment, fringe width increases if? → Wavelength increases

English:

Identify the compound sentence: "She wanted to go, but she stayed home."

Synonym of "Diminish"? → Reduce

Antonym of "Hostile"? → Friendly

Error spotting

Preposition: He is interested ___ science. → in

Overall, the test was balanced but required strong conceptual clarity. Biology and organic chemistry were the toughest sections, while Physics numericals were lengthy. Still, Alhamdulillah, I attempted with confidence and passed.
